

The Advocate's Guide to the Medicaid Program (2011)

For nearly 40 years, advocates, policy makers, and others have relied on the *Advocate's Guide to the Medicaid Program* to assure that the Medicaid program is implemented as the law intends, and that eligible low-income people can access the services that the program provides.

Released in June 2011, NHeLP's **comprehensive updated *Guide*** is available in hard copy, as well as by online membership, **for the first time featuring brand new interactive web features, such as live updates and user forums.**

This widely anticipated update incorporates provisions from the Patient Protection and Affordable Care Act (2010), the Children's Health Insurance Program Reauthorization Act (2009), and the Deficit Reduction Act (2005). The *Guide* covers Medicaid administration, eligibility, and services, drawing extensively from numerous sources: the United States Constitution, the Medicaid Act, the Medicaid regulations, federal guidance documents, and federal and state court case law. Support for this guide was provided by a grant from the Robert Wood Johnson Foundation.
